

Areas of Interest

• AI/ML

• Cloud Technology

• React-Java/Python Full Stack

• DBMS

• DSA

Technical Skills

- **Programming Languages:** Python 3, C/C++, JAVA,
- **AI/ML:** Gen-AI, Computer Vision, LLM, LangChain, RAG, ML Algorithms, Diffusers, LoRA, FAISS
- **DevOps:** AWS Services, GCP, OCI, Git, CI/CD, Terraform, Docker, Kubernetes, Serverless, Bash/Python, Security
- **Full Stack:** ReactJS, Spring Boot, Flask, FastAPI, NodeJS, HTML, CSS, JS, MySQL, MSSQL, PostgreSQL, Redis, Kafka
- **Libraries:** BOTO3, Ansible, TensorFlow, PyTorch, NumPy, Pandas, Matplotlib, Selenium, Tkinter

Experience

• AI/ML Deployment Consultant | Deloitte

(May'25 - Present)

Sector: Power Management & Energy Planning

• Managed team-wide **deployments** and cloud infrastructure across AWS and OCI accounts, reducing **cloud costs by 40%** and improving code efficiency by 20%.

• Led end-to-end delivery through project planning, DB design, **architecture** design, and cloud cost planning for end-to-end solution delivery.

• Handled client interactions and team management to ensure clear requirements, smooth execution, and on-time delivery.

• Delivered production-grade **10+ full-stack applications** and **ML-based solutions** for major power utilities

• Designed tools for weather, price, and demand forecasting, along with power scheduling workflows.

• Cloud Engineer | Siemens Digital Industries Software

(Jun'23 - Apr'25)

Project: Cloud Operations and Optimization for Teamcenter PLM software

• Focused on in-place, blue-green deployment and Container Migration gained insights into cloud system automation.

• Engineered automation scripts to manage **AWS** resources, increasing efficiency by 25% and reducing costs by 20%

• Implemented a CI/CD pipeline to automate the launch of **Ansible** workflows using AWS Lambda

• Actively participated in team discussions, offering ideas and solutions to overcome project challenges

• Software Developer Intern | Pratiti Technologies

(Jan'23 - Apr'23)

Project: Token Generation System for Bank

• Built a web application using MVC architecture and clean coding best practices, enhancing performance by 40%.

• Tech stack used : **ReactJS, JAVA, Spring Boot, MySQL, Git**

• Machine Learning Research Intern | Prof. Ram Meghe Research Institute

(Jun'22 - Dec'22)

Project: Air Quality Index Prediction & Analysis

• Developed and compared ML regression models, then Created a custom **Hybrid Model** combining Random Forest and Polynomial Regression. Also built a **stacking Regressor** Model which gives the accuracy score of 98%.

• used Data Visualization and Analysis tools. Also built A Model for Future AQI prediction using Time Series Analysis.

• Android Developer Intern | Fair-Share Technologies

(Mar'21 - Jun'21)

Project: Business tracking android application for grocery store

• User and Database Management using **Firebase** and Bill generation module

Key Projects

• **Shutter Labs: AI Product Photography**

(Oct'24 - Aug'25)

Built a platform powered by **custom**-trained generative models for branded visual asset creation at scale.

Delivered **text-to-image** generation, in-place **image editing**, and **context-aware** background synthesis tailored to product placement, camera angle, and lighting setup.

Enabled **3D-aware** composition control to generate studio-quality product visuals from custom viewpoints, reducing dependence on traditional photo shoots.

Tech stack used : **React, Flask, PostgreSQL, S3, AWS, PyTorch, Diffusers, Stable Diffusion, LoRA.**

• **Krushelligent: A sustainable App for Farmers**

(Sept'21 - Nov'21)

Developed android app with features of plant leaf disease detection and cure suggestion, Weather forecasting,

CNN and Transfer learning on ResNet-152V2 model to Detect Plant disease from the Images of plant leaf.

Tech stack used : **React Native, Django, PostgreSQL, CNN, Transfer Learning.**

• **Sport Person Classifier**

(Feb'22 - Feb'22)

Built an image classifier using **OpenCV, Haar Cascade**, and **Wavelet Transform**.

Used Python **Selenium** and web scraping to create the dataset and trained an **SVM** model to classify sports persons.

• **Betting Game**

(Feb'20 - Feb'20)

Inspired by an event of **Tech-fest 2020 @IITBombay** and present in **Prajwalan 2k20 @GCOEA**.

Using **C++** developed a 4 round game with different rules, which gives understanding of how public psychology works.

Academic Qualifications

Year	Degree/Certificate	Institute	CPI/%
2023	B.Tech. (IT)	Government College of Engineering, Amravati	8.7/10

Scholastic Achievements and Extra-curricular Activities

• Student of **Abhayanand Super-30** for a batch of 2018-19.

Studied one year in Rajasthan (NVS Migration Policy).

• Attended **Amazon ML Summer School India 2022**.

Regional in Football (2016).

Position of Responsibility

• Secretary of technical club ITSA of GCOEA.

Member of Institution of Engineers (India) Student chapter.

Organise an event in college technical fest Prajwalan 2k20.

• Training and Placement coordinator

Volunteer Tutor for students through JYOT Foundation.

Campus Ambassador | Spring Fest 2K21 @ IIT Kharagpur.
